

CHAPTER 1

L'Alliance opens its doors.

Chapter 1 of L'Alliance began with the construction of three buildings, offering a total of 73 apartments ranging from one to three bedrooms, as well as exceptional penthouses.

These residences were designed by the architecture firm CERAU, which is also the lead architect for the entire site. Their mission included not only the design of the buildings but also an urban planning reflection on roads, slopes, and the management of outdoor spaces. For L'Alliance, their ambition was to create the concept of a "lived-in park": staying in permanent contact with nature while having inviting gathering spaces and walking paths at hand. A place where living extends beyond the walls of the apartment or terrace to include the immediate environment.

These three passive buildings are not only more energy-efficient, but also more comfortable and cost-effective to live in. Each apartment was designed with meticulous attention to detail to meet the highest standards of its residents. The 73 apartments quickly found buyers and were delivered in 2016, to the delight of their new owners.
