

CHAPTER 2

L'Alliance moves forward.

Chapter 2 of L'Alliance continued with the construction of two new buildings, adding 59 apartments, from one to three bedrooms, including exclusive penthouses.

These passive apartments were designed by Montois Partners Architects. Living rooms were conceived to open onto spacious terraces, strategically positioned to benefit from maximum sunlight. These outdoor areas were designed as genuine living spaces. Some balconies were even designed as genuine winter gardens, with pivoting sliding glass panels. This allows residents to close the space during winter or create shelter from the wind in spring – a unique in-between space bridging indoors and outdoors.

All 59 apartments were sold and delivered in 2021.
