

L'Alliance builds a lasting and sustainable future.

A surprising hanging garden, generous outdoor spaces, and a wide range of apartment types... Chapter 4 of L'Alliance introduced 53 apartments in a high-quality project designed by the architecture and urban planning firm ABR.

Every apartment includes a generous and inviting outdoor area: private gardens on the ground floor, spacious balconies and terraces on upper levels, façades adorned with permanent greenery, and even a 170 m² hanging garden at the very heart of the building.

The building is, of course, entirely passive and compliant with the QZen standard. Thanks to its thoughtful volumetric design, the 53 apartments in Chapter 4 offer a wide variety of layouts: from exclusive penthouses to apartments with private gardens, two-bedroom through-units, and many other configurations.
